PROFESSIONAL SUMMARY

Passionate React Developer with strong expertise in building interactive, high-performance web and desktop applications using the **React.js ecosystem** and **Electron.js**. Proven track record of developing scalable SaaS products with complex state management and responsive UI/UX designs. Skilled in translating design mock-ups into pixel-perfect, reusable code using modern tools like **Redux Toolkit**, **Next.js**, and **Tailwind CSS**. Dedicated to writing clean, maintainable code and optimizing frontend performance.

TECHNICAL SKILLS

- **Core Frontend:** React.js (Hooks, Context API), JavaScript (ES6+), TypeScript, HTML5, CSS3.
 - **State Management:** Redux Toolkit, React Query.
 - **Styling & UI:** Tailwind CSS, Framer Motion, GSAP, Styled Components, Bootstrap.
 - **Frameworks & Tools:** Next.js, Electron.js, Vite, Webpack, Git, Figma to React.
 - **Testing & Validation:** React Hook Form, Zod, Jest.
-

PROFESSIONAL EXPERIENCE

React / Frontend Developer (SaaS Focus) *Independent Development* | Jan 2025 – Present

- **Project: Tax Management SaaS Platform (Sri Lanka)**
 - Developing a dynamic frontend for a cloud-based tax filing system using **React.js** and **TypeScript**.
 - Implementing complex forms and validation logic using **React Hook Form** and **Zod** to handle user inputs accurately.
 - Designing reusable UI components to ensure consistency across the application.
 - Managing global application state and user sessions securely using **Redux Toolkit**.

- **Project: Cloud POS & Inventory System**

- Leading the frontend migration of a legacy desktop system to a modern web-based SPA (Single Page Application).
- Optimizing component rendering performance to handle real-time inventory updates without lag.

UI/UX Developer *Ceylon Weighing Machines | Apr 2024 – Oct 2024*

- Designed and prototyped user interfaces using **Adobe XD**, focusing on user journey mapping and accessibility.
- Collaborated with backend developers to integrate frontend UIs with VB.Net logic, ensuring seamless data flow.
- Enhanced the visual experience of industrial software, reducing user training time by improving layout intuitiveness.

Freelance React Developer *Remote | Jan 2023 – Mar 2024*

- **Desktop Application (Electron + React):** Built a standalone Pharmacy POS system. Leveraged **React's component-based architecture** to create a modular and maintainable codebase.
- **Offline Functionality:** Implemented local data storage and synchronization logic using **SQLite** within the Electron environment.
- **Responsive Design:** utilized **Tailwind CSS** to build a fully responsive layout that adapts to different screen sizes and devices.
- **Custom Chatbot UI:** Developed a conversational interface for a WhatsApp-based bot, handling real-time message updates via **Web Sockets**.

Web Developer *Global Cloud Tech Solutions | May 2021 – May 2022*

- Built and maintained responsive websites, ensuring cross-browser compatibility and mobile optimization.
- Integrated third-party APIs and libraries to enhance website functionality and user engagement.

Web Developer *Sanota Pvt Ltd | March 2020 – Sept 2020*

- Built and deployed the company's official corporate website using the Bootstrap framework, ensuring full mobile responsiveness.

KEY PROJECTS (Code Samples on GitHub)

Interactive 3D Portfolio (TVA Theme)

- **Tech:** React, Three.js, Framer Motion.
- **Highlight:** Developed an immersive 3D user experience with custom shaders and complex animations, demonstrating advanced DOM manipulation skills.

MERN User Management Dashboard

- **Tech:** MongoDB, Express, React, Node.js.
 - **Highlight:** Implemented full CRUD operations with secure authentication (JWT) and responsive tables for data visualization.
-

EDUCATION

Higher National Diploma in Software Engineering *Coventry University (NIBM) | Completed: 2024*

Diploma in Software Engineering *Coventry University (NIBM)*

CERTIFICATIONS

- **JavaScript (Basic)** – HackerRank (2025)
 - **Python for Beginners** – University of Moratuwa (2023)
-
